As part of the Shale-Inland family of companies, our strategy is to deliver stainless, aluminum, and carbon steel products and parts, JIT, to North American OEMs. We can provide you with all your stamping, fabricating, assembly and other customer product needs from a 200,000 sq. ft. facility in Chicago.

- ◆ We are a Tier 1 supplier of parts to the U.S. auto industry, truck trailer industry and high quality cookware industry.
- ◆ We are an integral supplier to other major markets including locomotive, heavy equipment, appliance and HVAC.

Shale-Inland Stamping & Fabricating achieves complete customer satisfaction by providing design, engineering, research, development and manufacturing services on a timely basis.

Certified per ISO/TS 16949:2009 3rd Edition

UNMATCHED CAPABILITIES AND CUSTOMER SERVICE

METAL STAMPING DIVISION

Although we manufacture all types of basic stamping, Shale-Inland Stamping & Fabricating has developed an expertise for complex stampings, specializing in progressive dies with the large number of stations required for complex parts. This can result in reduced costs by eliminating secondary operations and improving production throughout. Our team has decades of combined experience in stamping, fabrication and engineering.

Equipment/Capabilities: 54 presses ranging from 10–1,000 Tons, large bed sizes.

METAL FABRICATION DIVISION

Shale-Inland Stamping & Fabricating is a full service fabricator ranging from prototypes to full production runs. We have the capability to receive part files electronically and thus create prototypes in as little as 24 hours. Specializing in stainless steel, our material range also includes cold rolled steel, hot dip galvanized, electro-galvanized, aluminum and more.

Equipment/Capabilities: Brake presses, turret presses, 5,000 watt lasers, shears, machining centers, precision welding, drill presses/tapping machines.

ASSEMBLY SERVICES

With our in-house welding, Shale-Inland Stamping & Fabricating can supply complete parts and assemblies. We can assemble UL, NSF, and NFPA labeled and compliant products, using outside purchased electronics combined with our wire harness capabilities.

Equipment/Capabilities: Welding, spot welding, riveting.

CUSTOM PRODUCTS

Shale-Inland Stamping & Fabricating also has a custom products division that is uniquely represented by our designed and manufactured products: Laundry and trash chutes, trash compactors, commercial kitchen fabrications, stainless steel cabinetry.
